

The weight customizable vinyl stabilizer

## STB-MS

The heavy weight vinyl stabilizer

## STB-HW

「STB-MS」 is the original vinyl stabilizer produced with innovation concepts. It is composed by detachable 10 parts and its weight is changeable by the number of the weights for your best timbre tuning. And, the optional carbon weight, 「STB-CM」, can be equipped according to your preference. Furthermore, it can be used for EPs by flipping it upside down.

The 「STB-HW」 is the heavy-weight model which is the heaviest vinyl stabilizer on the market when it is full-weighted condition. It enhances the tracing ability of the groove to the maximum.

**Release Date : 2010 / 6 / 30**

●Composition : A5052 Aluminum cut by NC machining, Alumite treatment (top/bottom disc)、Silver carbon FRP (surface)、Chrome plated pure brass (Weight×6・Axis×1)、Silver carbon sheet (Weight spacer×1)

●Weight / Dimension :

STB-MS 200 g (without weights) ~ 440 g (with weights) \*weight changeable by unit (40 g) ・φ70mm H35mm

STB-HW 240 g (without weights) ~ 790 g (with weights) \*\*weight changeable by unit (90 g) ・φ70mm H55mm

### <FEATURE>

- The hybrid component of Aluminum, brass and silver carbon controls vibration on the turntable to stabilize the trace of stylus.
- It has customizable weight function by brass weights for your favorite timbre tuning.
- Optionally, It also possible to change the brass weights to the carbon weight, "STB-CM".
- It can be used for a turntable with floating suspension system such as "LINN LP-12" only when it has no brass weights or it equipped with 6 of carbon weights.
- It fits your hand for smooth operation by ergonomics design.
- It can be used as an EP stabilizer by flipping it upside down.
- The silver carbon soft weight spacer which damps the mutual interference of vibration is equipped and removable.
- STB-MS, 35mm height, can be used when the turntable cover is closed.
- It enhances the sound quality with our original turntable sheet, MJ-12.
