

BLACK MAMBA-Σ PCOCC-A **Beryllium**

PCOCC-A Conductor Power Cable with beryllium buff finished plug & connector

1.8 m

 Cable : BLACK MAMBA (PCOCC-A)
 Plug / Connector : Beryllium, non-plating buff finished Version

BLACK MAMBA power cable was originally developed for professional recording studio in which flat and colorless sound character are required for a cable. This time, we modified it for home sound system and it was produced as the BLACK MAMBA-Σ.

It was planned by totally different perspective and concept from TUNAMI GPX series which is a symbol of Oyaide power cable and became a standard and best-selling power cable. The clean and crystal clear sound character bring an alternative variation to the power cable lineup of Oyaide.

Release Date : 2010/ 6/ 30

3.5sq cable diameter makes it flexible and setting cables easier. And it equipped with the blade/contact made by beryllium copper which has high reputation by application of our premium line plug/connector/receptacle, M1/F1/R1. Taking advantage of the high conductivity of beryllium copper, the blade is non-plating and buff-polished for getting rid of additional sound color by the power cable. The name of the fast-moving snake, Black mamba, and the symbol of electric conductivity, sigma, expresses the high-speed electric flow of BLACK MAMBA-Σ.

<FEATURES>

- The clear and powerful sound by 3.5sq PCOCC-A power unit compatible for 20A.
- The insulator made of polymer polyolefin and inclusion made of low-dielectric flex PE attenuate vibration.
- The perfect noise protection by copper foil shield which has 100% shielding ration and copper drain wire.
- Fused glass sleeve is newly employed for its outer sleeve in addition to the halogen-free sheath which has excellent vibration damping property and electric characteristic.
- The original plug with beryllium copper blades (non-plating, buff-finished) has hi-resolution sound characteristic.
